LEARNLAB® Electrical Training Equipment 800-348-8447

**Classroom Training Set** SKU#722301511701

## LearnLab's "Hands-On" Desktop Training Systems

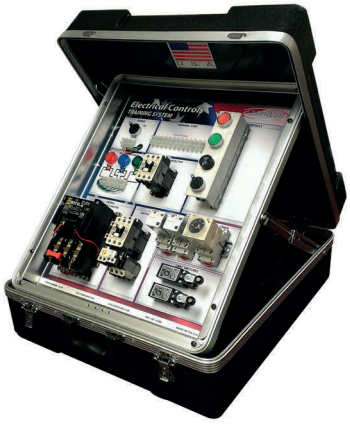
Take advantage of LearnLab's highly effective yet practical training programs and hands-on electrical training equipment to train your students or employees.

**Desktop**

These training systems are great for testing potential electrical employees before you hire them. Make them prove that they have the skills that you, as an employer, require.

Heavy duty and American made. Built with rugged steel frames, aluminum placards, and real world industrial grade components commonly used all over the world.

Each Training System includes a Thumb Drive containing a PowerPoint presentation, printable workbooks, and curriculum.



**Flight Case**

LearnLab's Flight Case Series provides a solution for easy storage and mobility. Designed for on road use, these heavy duty yet light weight training systems are ideal for traveling instructors, vocational trades teachers, human resources departments, and in house safety training and testing.

Rugged and Field Tested. The lockable flight case is made of ABS and aluminum. They are also gasket sealed for maximum protection against dust, moisture and other unwanted agents.

MADE IN THE USA!

## Electrical Controls Desktop Training System

SKU#722301511503

This electrical training system teaches the basic wiring and troubleshooting of an electrical controls system. This training system is so effective it will have even entry level maintenance personnel troubleshooting the most difficult problems in electrical control systems!

## Programmable Controls Desktop Training System

SKU#722301511510

In this class, students will learn how the Programmable Logic Controller is connected in common circuits and will actually wire input and outputs on a real working Automation Direct PLC. This panel is great for teaching students the automation of electromechanical processes.

## Allen Bradley PLC Desktop Training System

SKU#722301511695

In this class, students will learn how the Programmable Logic Controller is connected in common circuits and will actually wire input and outputs on a real working Allen Bradley PLC. This panel is great for teaching students the automation of electromechanical processes.

## Electrical Controls Flight Case Series Training System

SKU#29741671416

## Programmable Controls Flight Case Series Training System

SKU#29741671386

## Allen Bradley PLC Flight Case Series Training System

SKU#29741671393

## Variable Frequency Drives Desktop Training System

SKU#722301511527

This Variable Frequency Drive (VFD) training class is designed for working on real powered electrical circuits that includes an Automation Direct GS1 Variable Frequency Drive to control the three phase motor.

## Allen Bradley VFD Desktop Training System

SKU#722301511688

This Variable Frequency Drive (VFD) training class is designed for working on real powered electrical circuits that includes an Allen Bradley Variable Frequency Drive to control the three phase motor.

## Safety Lock-Out Tag-Out Desktop Training System

SKU#722301511626

This system is designed to be the "First Step" in a workers safety training process. Lock and Tag training is now required by NFPA70E. Students will learn how to properly apply all common workplace lockouts with this easy to use hands-on training system.

## Variable Frequency Drives Flight Case Series Training System

SKU#029741671362

## Allen Bradley VFD Flight Case Series Training System

SKU#029741671379

## Lock-Out Tag-Out Flight Case Series Training System

SKU#29741671409

## Electrical Wiring Desktop Training System

SKU#722301511534

With this "Hands-On" Electrical Wiring Training System, students will learn the basics of branch wiring in a Commercial or Residential setting. This training system is perfect for teaching construction trade students the basics of electrical wiring.

(The Electrical Wiring Training System is not currently available in the Flight Case Series)

## "Magic Motors" Electric Motor Troubleshooting Simulator

SKU#722301511589

Train your students on how to find and identify problems with electric Motors fast! Simulates Wye and Delta motors. Sturdy yet light weight. Ideal for the traveling instructor.

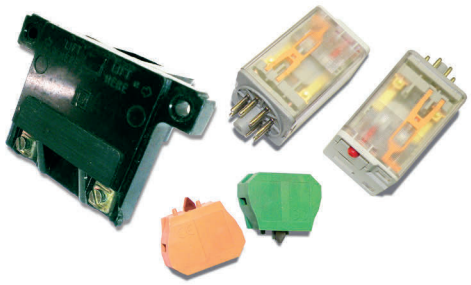
## 6 Pack Vocational Training Sets

Order a Pack of six and save over $1000. Available in all of our Training Systems including the Flight Case Series.

The Six Pack Sets include six training systems of your choice, six Tool and Accessory Kits, and six Faulty Component Bugging kits.

**Electrical Controls Training System Six Pack** SKU#029741671263

## Training System Accessories



**Faulty Component Bugging Kit**
